NAME INDEX

Afifi, A. A., 73, 101
Agresti, A., 206, 243
Aitkin, M., 159, 182
Akaike, H., 321, 344
Akpom, C. A., 326, 345
Alexander, J., 4*n*, 33
Allison, P. D., 71–103
Alwin, D. F., 38, 46, 50, 51, 52, 54, 55, 58*n*, 68, 110, 129
Andersen, E. B., 193, 203, 206, 244, 317, 344
Anderson, T. W., 79, 101, 166, 182
Andrews, D., 260, 284
Andrews, F., 348, 361
Andrich, D., 182, 200, 203
Anscombe, F. J., 134, 143
Arminger, G., xiii, 148, 182, 363–372
Austin, J. L., 9–10*n*, 33
Axelson, R., 146*n*

Bailar, B. A., 186, 187, 203
Baker, R. J., 220, 244
Bastian, M., 1*n*, 33*n*, 34
Baxandall, M., 5, 6–10, 7*n*, 11, 13*n*, 14, 34
Beale, E. M. L., 78, 101
Becker, M. P., 207, 234, 235*n*, 241, 243, 244
Ben-Israel, A., 44, 68
Bentler, P. M., 38, 44, 68, 74, 95, 101, 106, 110, 125 127
Berelson, B., 166, 183
Berezin, M., 1*n*
Berger, J., 384, 389
Berk, R. A., 89, 101, 146*n*, 231*n*, 244, 368, 370, 372, 374, 390
Bershad, M., 186, 190, 204
Bhapkar, V. P., 149, 182
Beilby, W. T., 71*n*, 72, 83, 84*n*, 85, 90, 101, 102, 109, 110, 111, 128
Biemer, P. B., 187, 203
Bishop, Y. M. M., 60, 61*n*, 68, 147, 167, 182, 196, 202, 203
Blyth, C. R., 141, 143
Bock, R. D., 159, 182
Bohrnstedt, G. W., xiii, 363–372
Bollen, K. A., 37–69
Bonett, D. G., 110, 127
Bongaarts, J., 248, 250, 266, 284
Boruch, R. F., 371, 372
Bourdieu, P., 3, 14, 25, 34, 210, 244
Bowles, S., 210, 244
Box, G. E. P., 133, 143
Braun, H., 253, 284
Breen, R., 206, 220, 244
Brooks, J., 1*n*, 14, 34
Brown, C. H., 73, 102
Browne, M. W., 60, 61, 68, 125, 128
Bunge, M., 375*n*, 385, 387, 388, 390
Bunting, B., 105*n*
Buse, A., 115, 125, 128
Byron, R. P., 114, 115, 128

Calhoun, C. J., 16, 34
Campbell, E. Q., 368, 372
Campbell, N. R., 375*n*, 390
Campbell, R. T., 210, 245
Cassel, C., 202, 203
Chammah, A. M., 387, 391
Cherkaoui, M., 210*n*, 244
Chiang, C. L., 326, 328, 329, 330, 331, 338, 344
Christoffersson, A., 320, 345
Cinlar, E., 254, 284
Cleveland, W. S., 354*n*, 361
Clive, J., 310, 346
Clogg, C. C., xiv, 37*n*, 143, 146*n*, 147, 180, 182, 206, 208, 215, 218, 219, 220, 235*n*, 243, 244
Coale, A., 250, 263, 284
Cochran, W. G., 140, 144, 187, 190, 191, 203
Cohen, J. E., 382, 383, 390
Cohen, R. E., 389, 390
Coleman, J. S., 368, 372, 381, 382, 390
Collins, R., 381, 390

Cordray, D. S., 382, 389, 390
Costner, H. L., 106, 128, 374, 390
Cowles, M., 347*n*, 349, 357*n*, 361
Cox, D. R., 132, 134, 143, 191, 196 203, 260, 284
Cressie, N., 146*n*, 159, 161, 182, 185*n*, 195, 202, 203
Croce, B., 17, 34
Crowder, M., 32, 34
Crowe, K. M., 389, 390

Davis, C., 347*n*, 349, 357*n*, 361
DeMaio, T., 185*n*
Dempster, A. P., 79, 94, 102
de Pijper, W. M., 106, 111, 119, 124, 128, 129
DiMaggio, P., 1*n*
Dixon, W. J., 79, 102
Donner, A., 73, 102
Douglas, G. A., 179, 184, 193, 203
D'Souza, S., 251, 264, 284
Dumand, J. W. M., 389, 390
Duncan, O. D., 38, 68, 145–184, 185*n*, 193, 194, 195, 200, 201, 202, 203, 204, 216*n*, 244, 369, 372

SUBJECT INDEX

Activities of daily living, 326, 332, 335, 337
Adjusted-effect displays, 356–358
Adjusted means in analysis of variance and covariance: previous work, 348
  adjusted effects in multiple-classification analysis (analysis of variance without interactions): Andrews, Morgan, and Sonquist, 348
  adjusted means in analysis of covariance: Fisher, 348
  adjusted means in analysis of variance and covariance (estimated population marginal means): Searle, Speed, and Milliken, 348–349
  adjusted means (least-squares means) in analysis of variance and covariance: Goodnight and Harvey, 348
ADL. *See* Activities of daily living
African cultural knowledge transmitted to New World, 25–26
Agent. *See* Social agent
A half (prior) success and a half (prior) failure appended to data, 132, 134, 141, 143
Algorithm
  expectation maximization (EM), 78–79, 94
  factoring the likelihood, 78, 79, 92
  iterative, 79, 92, 220, 240, 314
  listwise deletion, 73, 86, 90, 92
  maximum likelihood (ML), 71, 73, 74–83
  modified LISREL, 95–101
  Newton-Raphson, 78, 79
  pairwise deletion, 73, 93
  See also LISREL: modified algorithm; Program: LISREL
Analyst. *See* Social analyst
Anisotropy, 168, 170, 173, 177, 179
Art history as cultural data, 4
  Francis Haskell, art historian, 11–12
  Michael Baxandall, art historian, 5, 6–9, 11, 14
Artist. *See* Creative agent
Association, 150, 160

Effects
asymptotic variances of, 60–62, 64, 66
definitions of, 40
log-linear, 207
log-multiplicative, 206–207
sex-specific, 218, 219, 220, 225, 349–354, 358–359

specific (indirect), 37, 38, 39, 50–60, 66
total, direct, and indirect, 37–50
Effects, contamination. *See* Criticisms by Stanley Lieberson: contamination effects
Effects, decomposition of, 37–50
path-oriented approach, 39, 55–60
variable-oriented approach, 39–55
Effects, design matrix of
hierarchically related regressor sets, 355, 358
interactions, 355
main effects, 355, 356
principle of marginality, 355*n*, 356
unordered relatives, 356, 357
Effects, diffusion, 369, 377
See also Criticisms by Stanley Lieberson: contamination effects
Effects, specific (indirect), 37, 38, 39, 50–60, 66
a generalization of, 38, 39, 55–60, 64
definitions of, 50–52
exclusive, 51, 52, 53–54, 55, 57–58, 59
inclusive, 52, 54, 55, 56, 57, 59
incremental, 51, 52, 54, 58*n*, 59
Effects, total, defined as:
reduced-form coefficients, 37, 38, 40, 46–48, 52, 66
sums of powers of coefficient matrices, 37, 38, 40–46, 48, 54, 55, 66
Eigenvalue, 44, 45, 46, 55, 56, 63, 222, 235*n*
of central Wishart matrix, 222, 235*n*
Empirical illustration
changes in fertility rates, 369
comparative survival rates (an undoable problem), 382–383
components of stratification, 62–66
consumer demand, 379
correlation between father's occupation and his education, 83–88, 94
Cowles and Davis: volunteering for psychological experiments, 349–359
crime control program, 370
differences between Nigerian and Western romance novels, 2, 6, 28–33
effect of father's education and occupation on off-spring education, 88–92
evaluation of questionnaire items to determine data quality, 186, 196–201
federal fiscal policy, 378
Fuguitt-Zuiches: current and preferred residence, 148, 173–180
husbands' and wives' reports of sexual fun, 148, 151–165
Hutterite fertility, 247–248, 250–251, 263–266, 266–282, 283
Hutterite fertility data appendix, 287–307
income maintenance, 382
intercity race riot variation, 379–380
international trade, 384–385
legal and illegal Mexican immigration, 388
long-term care and risk reduction, 310, 312–313, 326–344
political attitudes, 148, 165–173
private vs. public school, effect on achievement, 368
promotion of new contraceptive technology, 377–378
relationship of family background to educational careers in France, 205–240
Escape rate. *See* Hazard rate
Estimator
Bayesian posterior interval, 131–144
biased, 367
consistency, definition of, 73
consistent, 61*n*, 71, 73, 78, 79, 94, 312, 314, 316, 317, 319, 366, 367
efficiency, definition of, 73
efficient, 71, 73, 79, 94, 365
generalized least squares (GLS), 60, 61, 78
logit-based interval, 131–144
marginal likelihood, 311, 314, 315, 317, 318, 328
maximum likelihood (ML), 60, 61, 62, 71, 73, 88, 90, 92, 93–94, 109, 122, 132, 134, 142, 143, 159, 218, 220, 242–243, 311, 312, 314, 315, 317, 320, 321, 359–360
maximum likelihood with incomplete

data, 74–83, 86, 89, 95–101
of measurement error, 72
minimum-variance unbiased, 78
nonparametric marginal likelihood, 315
nonparametric maximum likelihood (NPMLE), 249, 255, 256, 258, 262, 268, 269*n*, 315–316, 319
nonrobustness, 249, 250, 255
ordinary least squares (OLS), 78, 89, 90, 92, 367
of overall response bias (NDR), 191–192, 201
Poisson likelihood, 314, 322
robust, 315
unbiased, 143
unbiased, of error variance, 360
unbiased, of treatment effects, 370
